RE-MELT to **REUSE** over **35x**

shesto™

Make Moulds of Objects YOU Choose!
Then re-melt the mould to make another one!

CONFORMS TO ASTM D-4236, Certified food contact safe and non toxic.

Mould Making Materials - Food Contact

Food Contact - 10 oz (283g) **CMFC10**

Food Contact - 20 oz (567g) **CMFC20**

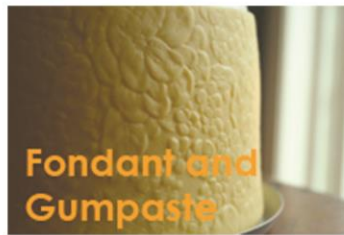

Food Contact - 40 oz (1.13kg) **CMFC40**

Remeltable and reusable food-contact safe mould making material for chocolates, fondants, gum paste and more.

CERTIFIED FOOD-CONTACT SAFE AND REUSABLE OVER 35 TIMES! MAKE MOLDS THAT YOU WANT BY DUPLICATING YOUR OWN OBJECTS.

CompositMold-FC is a 100% reusable mould making material for chocolate, fondants, gum paste castings. It's a flexible, rubbery, moulding material that works by melting and pouring. Many casts can be made using the same mould. CompositMold-FC is good for the mould maker and confectionery artist because it can be reused to make different moulds without worrying about wasting mould making material.

Food Contact Mold Release **CMVOMR-FC**

For Mould Making Projects Using Edible Casting Materials.

Non-Toxic & Food-Contact Safe.

Food Contact Safe-Mould Release allows you to easily remove original and edible casted parts from your CompositMold mould.

Directions When Making Your Mould:

Using the included dauber, apply a thin even coat to your original part. Pour your melted CompositMold.

When making your castings with chocolate and fondant, it is not typically necessary to use a mould release.

Net: 4 fl oz (118ml) Ingredients: Vegetable Oil

CompositMold-FC is the same great mould making material as the original CompositMold-LT yet specially formulated and certified safe for edible casting materials.

Complies with FDA Regulations (21 CFR Parts 170-189) for food contact materials. Not intended for ingestion.
